

2019 ANNUAL REVIEW

NOTICE OF ANNUAL MEETING
PROXY STATEMENT
FORM 10-K

“IN A VERY REAL WAY,
THE COMPANY IS
CREATING MAGIC”

IT BUSINESS EDGE

High-performance computers are essential instruments of scientists, researchers, artists, and creators. We make tools with amazing and incredible possibilities. Like a time machine, we make computers for the Einsteins and da Vincis of our time to help them see and create the future. Few companies stand at this intersection. It inspires us and is our core purpose. I can't imagine more important work.

JENSEN HUANG

CEO and Founder, NVIDIA

“NVIDIA IS BRINGING REAL-TIME RAY TRACING TO THE MASSES”

ENGADGET

The evolution of modern PC games has pushed the limits of what's possible in photorealistic computer graphics. The Turing architecture has arrived to blow those limits away. Turing-based GeForce RTX simulates the behavior of light in real time to create beautiful graphics and impossibly real gaming experiences. And with Microsoft DXR, gamers can enjoy ray-traced graphics across Microsoft's wide gaming ecosystem.

With more than 200 million gamers, GeForce is PC gaming's largest platform. GeForce RTX GPUs and GeForce Experience turn average PCs into powerful gaming machines. And technologies like ultra-thin Max-Q laptops and GeForce NOW cloud-based gaming are giving rise to an entirely new generation of gamers.

Battlefield V as captured by NVIDIA Ansel RTX, a powerful in-game camera that lets users take professional-grade photographs of their games.

“PUSHING THE BOUNDARIES OF PHOTOREALISM”

TECH CRUNCH

The Turing architecture is changing the game for designers and creators. Quadro RTX delivers photoreal graphics that creators didn't expect for another 5-10 years. Quadro RTX GPUs can now accelerate photoreal rendering for large industries such as film, animation, architecture, and product design, that previously only used CPU server farms. NVIDIA has reinvented computer graphics, again.

From *The Speed of Light*, a real-time cinematic experience using NVIDIA Turing architecture, RTX technology, and new Unreal Engine rendering advancements, featuring the Porsche 911 Speedster Concept.

“NVIDIA HAS A 10-YEAR LEAD WHEN IT COMES TO SOFTWARE FOR HPC AND AI”

NETWORK WORLD

A new era of high performance computing has emerged in today's datacenters. The new HPC is defined by three computing workloads: hyperscale applications run by cloud service providers, scientific computing in supercomputing labs, and enterprise data analytics and machine learning across industries like retail, healthcare, and financial services.

NVIDIA T4 GPUs and TensorRT inference software deliver significant inference capabilities for hyperscale. T4 is a universal cloud GPU that accelerates deep learning inference, as well as training, machine learning, data analytics, and graphics.

NVIDIA DGX-2 is the first 2-petaflops computer, combining 16 fully interconnected GPUs for 10X the deep learning performance.

In December 2018, DGX-2 achieved first place in six categories of the first-ever objective third-party AI benchmark, called MLPerf. The DGX platform has been adopted by all leading computer makers and cloud service providers.

NVIDIA now powers the fastest supercomputers in the United States, Europe, and Japan. The U.S.-based Summit supercomputer—the world's fastest—uses more than 27,000 NVIDIA V100 GPUs to achieve 144 petaflops of performance. On the most recent TOP500 list, NVIDIA added 41 new systems for a total of 127 supercomputers accelerated by NVIDIA.

The NVIDIA T4 GPU accelerates diverse cloud workloads, including high performance computing, deep learning training and inference, machine learning, data analytics, and graphics. T4 is optimized for scale-out computing environments and features multi-precision Turing Tensor Cores and new RT Cores.

“NVIDIA IS TAKING OVER THE AUTONOMOUS DRIVING INDUSTRY”

THE STREET

With production cars planned for 2020, autonomous vehicles are right around the corner.

NVIDIA DRIVE is a scalable AI car platform for the deployment of smart, safe self-driving cars. It's an end-to-end platform that includes the powerful DRIVE AGX in-car computer, software trained on DGX-2 supercomputers, and DRIVE Constellation, a VR simulator where autonomous vehicles can safely drive billions of miles in the datacenter.

DRIVE AutoPilot is the world's first commercially available Level 2-plus self-driving car computer. It combines world-class autonomous driving perception and a cockpit rich in AI capabilities, significantly surpassing today's ADAS offerings.

58
MPH

50-MILE DRIVE

In October 2018, NVIDIA's own self-driving car, BB8, completed a milestone 50-mile loop around the San Francisco Bay Area without its safety driver ever taking control. The car handled highway on- and off-ramps and numerous lane changes entirely on its own, marking a significant step toward a self-driving future.

ADVANCING GPU COMPUTING THROUGH TURBULENT TIMES

DEAR NVIDIAANS AND STAKEHOLDERS,

This was an extraordinary year. We achieved records in each of our businesses. It was also a challenging, turbulent year, particularly in the third and fourth quarters as the cryptocurrency boom ended sharply and datacenter customers became more cautious amid economic uncertainties. In the face of these headwinds, we made giant strides in advancing computer graphics, high-performance datacenter computing, and AI. We are well positioned to continue our growth.

Revenue rose 21 percent to \$11.72 billion, and gross margins expanded to 61.2 percent. GAAP earnings per share were \$6.63, up 38 percent. And we returned \$1.95 billion to shareholders through dividends and share repurchases.

Turing has arrived and is reinventing computer graphics. We name our new GPU architectures after great inventors, scientists, and artists. We name them after the people for whom we create our computers. Turing is our newest architecture. Turing-based GeForce RTX GPUs make possible real-time ray tracing, a method of creating photorealistic graphics that has been a dream our industry has pursued for nearly four decades. Turing makes this dream possible by combining inventions in ray tracing, AI, and programmable shading in a new approach to graphics we named RTX. For gamers, it's a giant leap from Pascal. Once you experience the heart-pounding

realism of real-time ray-traced graphics, you can't go back. Microsoft has adopted ray tracing in the next major Windows API, called Microsoft DirectX Raytracing, or DXR. Next-generation games can easily adopt ray tracing, and they'll be beautiful.

At CES 2019, we rounded out our RTX lineup with the GeForce RTX 2060, the first Turing GPU for the mass market and a major upgrade opportunity for millions of gamers. And we announced more than 40 new models of GeForce RTX gaming notebooks, addressing one of the fastest-growing segments in PC gaming today. Combining the incredible energy efficiency of our GPUs with our Max-Q system power optimization technologies, RTX notebooks are powerful yet thin-and-sleek gaming machines.

Our gaming business grew 13 percent this year to a record \$6.25 billion. With the cryptocurrency turbulence behind us and dazzling ray-traced games ahead, we expect the RTX lineup to drive sustained growth for our GeForce business.

We believe that one day everyone will be a gamer. Some will want to play on powerful gaming systems. Others will prefer the convenience to play anywhere and anytime there is a moment to spare. To expand the reach of games, we've been working for more than five years on a cloud gaming system—a virtual gaming PC in the cloud—called GeForce NOW.

In beta for about a year as we optimize the challenging performance and latency of cloud gaming, GeForce NOW has hundreds of thousands of registered users and a waitlist of a million more.

Turing opens the \$250 billion visual effects markets for our professional visualization business. Our pro workstation business achieved another record this year, growing 21 percent to \$1.13 billion. We're excited for the future as the Turing-based Quadro RTX is the most significant workstation GPU upgrade in a decade.

Quadro RTX excels at new applications like photorealistic rendering, data science, AI, and VR. Tens of millions of designers and creative artists will enjoy a boost in productivity and an array of all-new capabilities. Imagine walking through a photorealistic rendering of a new building in VR. Or having an AI program assist you by automatically creating parts of the building's design using generative-design technology. Partners like Dell, HP, and Lenovo have already announced workstations powered by Quadro RTX.

And with Turing's RTX ray-tracing capability, film studios can finally install NVIDIA GPUs in their render farms—providing a long-awaited performance leap to the graphics rendering process of modern filmmaking. Nearly every movie today includes some special effects and image enhancement. Our Quadro RTX server will accelerate this tedious process, delivering 4X the performance and one-third the cost compared to CPU render farms.

AI adoption by hyperscalers, cloud, and enterprises drove growth of 52 percent in our datacenter business, reaching \$2.93 billion for the year. We didn't meet our growth expectations for the fourth quarter as datacenter customers slowed purchases. The quarter overshadowed what was otherwise a year of great expansion of our datacenter portfolio.

NVIDIA accelerates three broad workloads of computing in “the new HPC” market: AI applications run by cloud service providers, scientific computing in supercomputing labs, and enterprise data analytics and machine learning across industries like retail, healthcare, and financial services.

It was a landmark year for NVIDIA in supercomputing. We now power the fastest supercomputers in the United States, Europe, and Japan. The U.S.-based Summit supercomputer—the world’s fastest—uses more than 27,000 NVIDIA V100 GPUs to achieve 144 petaflops of performance. On the most recent TOP500 list, we added 41 new systems for a total of 127 supercomputers accelerated by NVIDIA. The GPU-accelerated computing approach NVIDIA pioneered has proven to be the best path forward as the era of exponential scaling of the CPU ends.

Cloud service providers use state-of-the-art AI technologies when Google enhances and sorts your vacation photos, when Alexa answers questions or plays your song requests, or when Netflix recommends a movie for you to enjoy. These AI programs learned from examples and were written by giant computers.

NVIDIA’s GPUs and CUDA AI platform power many of these computers and are used by researchers, developers, and service operators around the world to create and deploy AI services. This year, we announced our second-generation Tensor Core GPU, called T4. It’s the most energy-efficient GPU and is designed for easy adoption by hyperscale and enterprise datacenters. T4 is super versatile, able to accelerate deep learning training and inference, machine learning, data analytics, and cloud graphics. Adoption of T4 during the year was terrific. In January 2019, Google Cloud announced availability of T4 GPUs in its datacenters in the U.S., Europe, Brazil, India, Singapore, and Tokyo. T4 is designed for scale-out computing—the architecture used by hyperscalers and enterprises—and optimized for computing services where many users share a datacenter as a utility.

We also announced a breakthrough in scale-up computing, where one computer is dedicated to a few people to achieve the fastest possible turnaround time. We launched NVIDIA DGX-2, the world’s first single-node computer to deliver two petaflops of deep learning performance. DGX-2 is powered by 16 fully interconnected Volta GPUs, pre-integrated with system software, and connected to the NGC cloud

Image courtesy of GamesBeat

store of accelerated applications. It’s a great example of NVIDIA’s transformation into a computing company. In December 2018, DGX-2 achieved first place in six categories of the first-ever objective third-party AI benchmark, called MLPerf. The DGX platform has been adopted by all leading computer makers and cloud service providers.

This year, we entered a new high performance computing market with the launch of the RAPIDS acceleration libraries for data analytics and machine learning. Developed with the open-source community, RAPIDS is a large suite of CUDA acceleration libraries that does for data scientists what we’ve done for deep learning developers. Data science is a field of computer science that applies algorithms to discover important insights from the seas of data collected by companies in healthcare, financial services, retail, and telecommunications. Companies use data science to forecast inventory, detect fraud and security breaches, connect riders to drivers, predict delivery arrival times, and help with lab experiments in drug discovery. Because of the vast amount of data involved, data science is one of the newest and most intensive HPC applications. We can help data scientists discover insights faster and work on much larger data sets with our computers.

We fueled innovation on and off the road with the NVIDIA DRIVE platform. Our auto business grew 15 percent this year to a record \$641 million, driven by the adoption of next-generation AI capabilities under the hood and inside the cockpit.

Our strategy is not to build self-driving cars, but to create a platform for every transportation company in the world to

build them. To do so, we built our own self-driving car to create the end-to-end systems that we offer to customers. The NVIDIA DRIVE platform includes DGX-based AI development systems, the DRIVE Constellation virtual reality simulator, our DRIVE AP2X autopilot computer, the full self-driving car and driver interaction software stacks DRIVE AV and DRIVE IX, and the fleet of mapping and testing cars called BB8.

Tier one partners rolled out new Xavier-based DRIVE AGX car computers, we brought functional safety to the DRIVE platform, and we completed our first hands-free, 50-mile loop around the San Francisco Bay Area with BB8.

At CES, we announced DRIVE AutoPilot, the world’s first commercially available Level 2-plus self-driving car computer. DRIVE AutoPilot uses deep learning networks, features surround camera perception both in and outside of the car, and boasts world-leading AI processing capabilities. It significantly surpasses today’s ADAS offerings. Already, Volvo, Continental, and ZF have selected DRIVE AutoPilot to power autonomous vehicles.

To accelerate the path to safe autonomous driving, we introduced DRIVE Constellation, a VR simulator where autonomous vehicles can safely drive billions of miles in the datacenter.

The world of autonomous machines extends well beyond self-driving cars. Eventually, every machine that moves will be autonomous—including hundreds of millions of warehouse forklifts, farming machines, and delivery robots.

CARING FOR OUR COMMUNITIES

The highest purpose of a company is to make a positive impact in the world. At the global level, we do so with our inventions and ideas. Across our sites around the world, we also contribute to making our local communities better. We balance our near-term business goals with long-term commitments to improving lives, protecting our environment, and creating new technologies that benefit society and raise the ladder of science ever higher.

We're proud to be recognized as one of the nation's best employers and most socially responsible companies by such lists as Fortune's Best Places to Work, the Corporate Equality Index, and the Dow Jones Sustainability Index. We debuted in FY19 on Barron's 100 Most Sustainable Companies list and Equileap's Gender Equality Index.

NVIDIAians are passionate about giving back through volunteerism and generosity. Our philanthropic giving this year, through contributions and community partnerships, exceeded \$5.3 million. And 73 percent of our offices around the world held fundraisers or volunteered in their communities during the year.

To date, the NVIDIA Foundation's Compute the Cure initiative has directed more than \$5 million to the fight against cancer, including more than \$365,000 raised by our employees last year for cancer organizations around the world.

BUILDING THE FUTURE

We started NVIDIA to solve real-time 3D graphics. Creating a realistic computer-simulated world is one of the greatest challenges in computing. After a quarter century of relentless pursuit, we're still working on it. We believed in the beginning that the endeavor would create one of the world's leading technology companies. We believe it now. Through our work we pioneered GPU computing and evolved it over the decades to advance the fields of computer graphics, high performance computing, and AI. Fundamentally, these areas share similar challenges. Each breakthrough opened the door to new and impactful challenges to tackle next.

Our NVIDIA Research team broke new ground this year in AI-based graphics technologies. Their work with GAN algorithms was particularly exciting, creating the first AI-rendered interactive virtual world.

We also opened a new AI Robotics Research lab in Seattle. The lab is working on a wide array of research projects, including robots that can mimic human motion, adapt to unstable surfaces, and even assist with kitchen tasks.

Technologies in our virtual robot training environment—where robots learned to putt a golf ball—are being applied to autonomous-vehicle simulators to improve the safety of tomorrow's self-driving cars. Our work in robotics will revolutionize manufacturing, agriculture, and space exploration. Robotics will even make future games more fun with AI characters that interact with you in make-believe worlds.

Our work is reshaping trillion-dollar industries like transportation, healthcare, and manufacturing, and fostering entirely new industries just taking root.

In healthcare, research doctors use our systems to develop deep learning AI techniques that detect diabetic retinopathy and cancer, study chest CT scans, or find hairline bone fractures. These AI models can work alongside radiologists to increase accuracy. We created the NVIDIA Clara computing platform, named after Red Cross founder Clara Barton, for researchers and imaging equipment makers. Clara unifies the computational pipeline of medical imaging systems so that these new algorithms can be more easily deployed in hospitals.

The computers NVIDIA makes are the essential instruments of scientists, researchers, artists, and creators. We make tools with amazing and incredible possibilities. Like a time machine, we make computers for the Einsteins and da Vincis of our time to help them see and create the future. Few companies stand at this intersection. It inspires us and is our core purpose. I can't imagine more important work.

This year will stand as one of the most extraordinary in our company's history. It was surely turbulent. Yet it was a year when we did some of our best work ever. The strides we made this year have positioned us solidly for the future. We look forward to tackling the exciting challenges ahead and making a positive impact on how the future turns out for generations to come.

Jensen Huang
CEO and Founder, NVIDIA

NVIDIA CORPORATION

NOTICE OF 2019 ANNUAL MEETING PROXY STATEMENT AND FORM 10-K

FORWARD-LOOKING STATEMENTS

Certain statements in this document including, but not limited to, statements as to: the impact, benefits, abilities, features and performance of our products and technologies; NVIDIA being well positioned to continue its growth; Turing reinventing computer graphics and making ray tracing possible; next-generation games being able to easily adopt ray tracing and their beauty; GeForce RTX 2060 being a major upgrade opportunity for millions of gamers; our expectation that the RTX lineup will drive sustained growth for our business; our belief that one day everyone will be a gamer, and how and where they will want to play; the benefits and market opportunity for Turing and our professional visualization business; Quadro RTX being the most significant workstation GPU upgrade in a decade; Quadro RTX enabling tens of millions of designers and creative artists to enjoy a boost in productivity and capabilities and its ability to deliver increased performance and reduced costs from CPU render farms; NVIDIA accelerating three broad workloads in the new HPC market; NVIDIA's GPU-accelerated computing approach being the best path forward as the era of exponential scaling of CPUs ends; data science being one of the newest and most intensive HPC applications and how NVIDIA can help data scientists to discover insights faster and work on much larger data sets; NVIDIA's strategy to create a platform for transportation companies to build self-driving cars; that every machine that moves will eventually be autonomous; NVIDIA working on creating realistic computer-simulated worlds and our belief that this will create one of the world's leading technology companies; NVIDIA's work in robotics revolutionizing manufacturing, agriculture and space exploration; robotics making future games more fun with AI characters that interact with you in make-believe worlds; NVIDIA's work and GPU computing reshaping trillion-dollar industries and fostering entirely new industries; looking forward to tackling the exciting challenges ahead and making a positive impact on how the future turns out for generations; NVIDIA's products serving as gaming's largest platform and giving rise to an entirely new generation of gamers; Quadro RTX's delivering graphics that creators didn't expect for another 5-10 years; autonomous vehicles being right around the corner; and our market position and strategies are forward-looking statements that are subject to risks and uncertainties that could cause results to be materially different than expectations. Important factors that could cause actual results to differ materially include: global economic conditions; our reliance on third parties to manufacture, assemble, package and test our products; the impact of technological development and competition; development of new products and technologies or enhancements to our existing products and technologies; market acceptance of our products or our partners' products; design, manufacturing or software defects; changes in consumer preferences or demands; changes in industry standards and interfaces; unexpected loss of performance of our products or technologies when integrated into systems; as well as other factors detailed from time to time in the reports NVIDIA files with the Securities and Exchange Commission, or SEC, including, but not limited to, its annual report on Form 10-K and quarterly reports on Form 10-Q. Copies of reports filed with the SEC are posted on the company's website and are available from NVIDIA without charge. These forward-looking statements are not guarantees of future performance and speak only as of April 12, 2019, and, except as required by law, NVIDIA disclaims any obligation to update these forward-looking statements to reflect future events or circumstances.

NOTICE OF 2019 ANNUAL MEETING OF STOCKHOLDERS

- Date and time:** Wednesday, May 22, 2019 at 10:30 a.m. Pacific Daylight Time
- Location:** Online at www.virtualshareholdermeeting.com/NVIDIA2019
- Items of business:**
- Election of twelve directors nominated by the Board of Directors
 - Approval of our executive compensation
 - Ratification of the selection of PricewaterhouseCoopers LLP as our independent registered public accounting firm for fiscal year 2020
 - Approval of an amendment and restatement of our Certificate of Incorporation to eliminate supermajority voting to remove a director without cause
- Transaction of other business properly brought before the meeting
- Record date:** You can attend, and vote at, the annual meeting if you were a stockholder of record at the close of business on March 25, 2019.
- Virtual meeting admission:** We will be holding our annual meeting online only this year at www.virtualshareholdermeeting.com/NVIDIA2019. To participate in the annual meeting, you will need the control number included on your notice of proxy materials or printed proxy card.
- Pre-meeting forum:** In order to allow for communication with our stockholders in connection with the annual meeting, we have established a pre-meeting forum located at www.proxyvote.com where you can submit advance questions to us.

Your vote is very important. Whether or not you plan to attend the virtual meeting, **PLEASE VOTE YOUR SHARES**. As an alternative to voting online at the meeting, you may vote via the Internet, by telephone or, if you receive a paper proxy card in the mail, by mailing the completed proxy card.

Important notice regarding the availability of proxy materials for the Annual Meeting of Stockholders to be held on May 22, 2019. This Notice, our Proxy Statement, our Annual Report on Form 10-K, and our Annual Review are available at www.nvidia.com/proxy.

By Order of the Board of Directors

A handwritten signature in black ink, appearing to read "T. S. Teter", with a stylized flourish at the end.

Timothy S. Teter

Secretary

Santa Clara, California

April 12, 2019

DEFINITIONS

2007 Plan	NVIDIA Corporation Amended and Restated 2007 Equity Incentive Plan
2012 ESPP	NVIDIA Corporation Amended and Restated 2012 Employee Stock Purchase Plan
2019 A&R Charter	The Company's proposed Amended and Restated Charter
AC	Audit Committee
Base Operating Plan	Performance goal necessary to earn the target award under the Variable Cash Plan and for the target number of SY PSUs to become eligible to vest
Board	The Company's Board of Directors
CC	Compensation Committee
CD&A	Compensation Discussion and Analysis
CEO	Chief Executive Officer
CFO	Chief Financial Officer
Charter	The Company's Amended and Restated Certificate of Incorporation
Company	NVIDIA Corporation, a Delaware corporation
Control Number	Identification number for each stockholder included in Notice or proxy card
Dodd Frank Act	Dodd-Frank Wall Street Reform and Consumer Protection Act
Exchange Act	Securities Exchange Act of 1934, as amended
Exequity	Exequity LLP, the CC's independent compensation consultant
FASB	Financial Accounting Standards Board
Fiscal 20__	The Company's fiscal year ended on the last Sunday in January of the stated year
Form 10-K	The Company's Annual Report on Form 10-K for Fiscal 2019 filed with the SEC on February 21, 2019
GAAP	Generally accepted accounting principles
Internal Revenue Code	U.S. Internal Revenue Code of 1986, as amended
Lead Director	Lead independent director
Meeting	Annual Meeting of Stockholders
MY PSUs	Multi-year PSUs with a three-year performance metric
Nasdaq	The Nasdaq Stock Market LLC
NCGC	Nominating and Corporate Governance Committee
NEOs	Named Executive Officers consisting of our CEO, our CFO, and our other three most highly compensated executive officers as of the end of Fiscal 2019
Non-GAAP Operating Income	GAAP operating income adjusted for stock-based compensation expense, acquisition-related and other costs, and legal settlement costs, as the Company reports in its respective earnings materials. The net aggregate adjustment to GAAP operating income for these items for Fiscal 2019 was \$603 million and for Fiscal 2018 was \$407 million. Please see <i>Reconciliation of Non-GAAP Financial Measures</i> in our CD&A for a reconciliation between the non-GAAP measures and GAAP results
Notice	Notice of Internet Availability of Proxy Materials
NYSE	New York Stock Exchange
PSUs	Performance stock units
PwC	PricewaterhouseCoopers LLP
RSUs	Restricted stock units
S&P 500	Standard & Poor's 500 Composite Index
SEC	U.S. Securities and Exchange Commission
Securities Act	Securities Act of 1933, as amended
Stretch	Performance goal necessary for the maximum number of MY PSUs to become eligible to vest
Stretch Operating Plan	Performance goal necessary to earn the maximum award under the Variable Cash Plan and for the maximum number of SY PSUs to become eligible to vest
SY PSUs	PSUs with a single-year performance metric, vesting over four years
Target	Performance goal necessary for the target number of MY PSUs to become eligible to vest
Threshold	Minimum performance goal necessary to earn an award under the Variable Cash Plan and for SY PSUs and MY PSUs to become eligible to vest
TSR	Total shareholder return
Variable Cash Plan	The Company's variable cash compensation plan

PROXY SUMMARY

This summary highlights information contained elsewhere in the proxy statement. This summary does not contain all of the information that you should consider, and you should read the entire proxy statement carefully before voting.

2019 Annual Meeting of Stockholders

Date and time: Wednesday, May 22, 2019 at 10:30 a.m. Pacific Daylight Time
Location: Online at www.virtualshareholdermeeting.com/NVIDIA2019
Record date: Stockholders as of March 25, 2019 are entitled to vote
Admission to meeting: You will need your Control Number to attend the annual meeting

Voting Matters and Board Recommendations

A summary of the 2019 Meeting proposals is below. **Every stockholder's vote is important. Our Board urges you to vote your shares FOR each of the proposals.**

Matter	Page	Board Recommendation	Vote Required for Approval	Effect of Abstentions	Effect of Broker Non-Votes
Management Proposals:					
Election of twelve directors	8	FOR each director nominee	More FOR than WITHHOLD votes	None	None
Approval of our executive compensation	24	FOR	Majority of shares present	Against	None
Ratification of the selection of PwC as our independent registered public accounting firm for Fiscal 2020	47	FOR	Majority of shares present	Against	None
Approval of an amendment and restatement of our Charter to eliminate supermajority voting to remove a director without cause	50	FOR	66 2/3% of shares outstanding	Against	Against

Election of Directors (Proposal 1)

The following table provides summary information about each director nominee:

Name	Age	Director Since	Occupation	Financial Expert	Committee Membership
Robert K. Burgess	61	2011	Independent Consultant	✓	CC
Tench Coxe	61	1993	Managing Director, Sutter Hill Ventures		CC
Persis S. Drell	63	2015	Provost, Stanford University		CC
James C. Gaither	81	1998	Managing Director, Sutter Hill Ventures		NCGC
Jen-Hsun Huang	56	1993	President & CEO, NVIDIA Corporation		
Dawn Hudson	61	2013	Independent Consultant	✓	AC
Harvey C. Jones	66	1993	Managing Partner, Square Wave Ventures	✓	CC, NCGC
Michael G. McCaffery	65	2015	Chairman & Managing Director, Makena Capital Management	✓	AC
Stephen C. Neal	70	2019	Chairman, Cooley LLP		
Mark L. Perry ⁽¹⁾	63	2005	Independent Consultant	✓	AC, NCGC
A. Brooke Seawell	71	1997	Venture Partner, New Enterprise Associates	✓	CC
Mark A. Stevens	59	2008 ⁽²⁾	Managing Partner, S-Cubed Capital		AC, NCGC

⁽¹⁾ Lead Director

⁽²⁾ Mr. Stevens previously served as a member of our Board from 1993 until 2006

Board Overview and Recent Refreshment

Our director nominees exhibit a variety of competencies, professional experience, and backgrounds, and contribute diverse viewpoints and perspectives to our Board. While the Board benefits from the experience and institutional knowledge that our longer-serving directors bring, it has also brought in new perspectives and ideas by appointing three new directors in the last four years, including, most recently in 2019, Stephen C. Neal, a veteran attorney and corporate advisor. Below are the skills and competencies that our NCGC and Board consider important for our directors to have in light of our current business and future market opportunities, and the number of directors who possess them:

Our NCGC and Board also consider diversity in business experience, professional expertise, gender and ethnic background among Board members in recommending nominees to serve as directors.

Corporate Governance Highlights

Our Board is committed to strong corporate governance to promote the long-term interests of NVIDIA and our stockholders. We seek a collaborative approach to stockholder issues that affect our business and to ensure that our stockholders see our governance and executive pay practices as well-structured. In the Fall of 2018, we contacted stockholders holding approximately 1% or more of our common stock (except for brokerage firms and index funds who we know do not engage in individual conversations with companies), representing an aggregate ownership of 27%, to gain insights into their views on corporate governance, executive compensation and environmental, social and corporate governance issues. Our management and a member of our Board met with stockholders holding, in total, 26% of our common stock.

Highlights of our corporate governance practices include:

- ✓ Proxy access
- ✓ Declassified Board
- ✓ Majority voting for directors
- ✓ Active Board oversight of risk and risk management
- ✓ All Board members independent, except for our CEO
- ✓ Independent Lead Director
- ✓ 75% or greater attendance by each Board member at meetings of the Board and applicable committees
- ✓ Independent directors frequently meet in executive sessions
- ✓ At least annual Board and committee self-assessments
- ✓ Annual stockholder outreach, including NCGC participation
- ✓ Stock ownership guidelines for our directors and executive officers

Approval of Executive Compensation for Fiscal 2019 (Proposal 2)

We are asking our stockholders to cast a non-binding vote, also known as “say-on-pay,” to approve our NEOs’ compensation. The Board believes that our compensation policies and practices are effective in achieving our goals of attracting, motivating and retaining a high-caliber executive team; rewarding financial and operating performance; and aligning our executives’ interests with those of our stockholders to create long-term value. The Board and our stockholders have approved holding our “say-on-pay” votes annually.

Executive Compensation Highlights

Our executive compensation program is designed to pay for performance. We utilize compensation elements that align our NEOs’ interests with those of our stockholders to create long-term value. Our NEO pay is heavily weighted toward

performance-based, “at-risk” variable cash and long-term equity awards that are only earned if the Company achieves pre-established corporate financial metrics, but capped at a maximum of 200% of target (or 150% of target for our CEO’s PSUs). For the last several years, approximately 90% of our CEO’s, and over 50% of our other NEOs’ target pay has been performance-based and at-risk, and 100% of our CEO’s equity awards have been in the form of PSUs only.

At our 2018 Meeting, over 97% of the votes cast approved the compensation paid to our NEOs for Fiscal 2018. After considering this advisory vote and feedback from our annual stockholder outreach, our CC concluded that our program effectively aligned executive pay with stockholder interests. Therefore, the CC maintained the same general executive compensation structure for Fiscal 2019, but increased the rigor of the target performance goals for revenue and Non-GAAP Operating Income by setting them aggressively above Fiscal 2018 actual achievement in order to motivate our executives.

Financial Highlights and Link to Executive Pay

Starting with a focus on PC graphics, NVIDIA invented the graphics processing unit to solve some of the most complex problems in computer science. We have extended our focus in recent years to the revolutionary field of artificial intelligence. Our platform strategy combines hardware, system software, programmable algorithms, libraries, systems, and services to create unique value for the Gaming, Professional Visualization, Datacenter, and Automotive markets. As described above, a significant portion of our executive pay opportunities are tied to achievement of rigorous financial measures that drive business value and contribute to our long-term success. The charts below show our achievement for each of these measures for the applicable period ended Fiscal 2019, and their respective impact on our executive pay.

⁽¹⁾ Calculated based on the average prices of NVIDIA’s common stock during the 60-trading day window that ended on the last trading day before the start of Fiscal 2017 and on the last trading day of Fiscal 2019, assuming all dividends were reinvested on the ex-dividend date.

⁽²⁾ Excludes Mr. Teter, who joined NVIDIA in late Fiscal 2017.

⁽³⁾ Includes dividends paid during the period beginning with Fiscal 2017 and ending with Fiscal 2019.

Please see *Reconciliation of Non-GAAP Financial Measures* in our CD&A for a reconciliation between the non-GAAP measures and GAAP results.

Ratification of the Selection of PwC as our Independent Registered Public Accounting Firm for Fiscal 2020 (Proposal 3)

Although not required, we are asking our stockholders to ratify the AC’s selection of PwC as our independent registered public accounting firm for Fiscal 2020 because we believe it is a matter of good corporate practice. If our stockholders do not ratify the selection, the AC will reconsider the appointment, but may nevertheless retain PwC. Even if the selection is ratified, the AC may select a different independent registered public accounting firm at any time if it determines that such a change would be in the best interests of NVIDIA and our stockholders.

Approval of an Amendment and Restatement of our Charter (Proposal 4)

We are asking our stockholders to approve an amendment and restatement of our Charter to eliminate a supermajority vote to remove a director without cause. The Board recommends a vote FOR this proposal because it is committed to good corporate governance and stockholder rights and believes that permitting director removal without cause by a simple majority vote is consistent with industry practice.

NVIDIA CORPORATION
2788 SAN TOMAS EXPRESSWAY
SANTA CLARA, CALIFORNIA 95051
(408) 486-2000

PROXY STATEMENT FOR THE 2019 ANNUAL MEETING OF STOCKHOLDERS - MAY 22, 2019

INFORMATION ABOUT THE MEETING

Your proxy is being solicited for use at the 2019 Meeting on behalf of the Board. Our 2019 Meeting will take place on Wednesday, May 22, 2019 at 10:30 a.m. Pacific Daylight Time.

Meeting Attendance

If you were an NVIDIA stockholder as of the close of business on the March 25, 2019 record date, or if you hold a valid proxy, you can attend, ask questions during, and vote at our 2019 Meeting at www.virtualshareholdermeeting.com/NVIDIA2019. Our 2019 Meeting will be held entirely online. Use the Control Number included on your Notice or printed proxy card to enter the meeting. Anyone can also listen to the 2019 Meeting live at www.virtualshareholdermeeting.com/NVIDIA2019. An archived copy of the webcast will be available at www.nvidia.com/proxy through June 5, 2019.

Even if you plan to attend the 2019 Meeting online, we recommend that you also vote by proxy as described below so that your vote will be counted if you later decide not to attend.

Virtual Meeting Philosophy and Benefits

The Board believes that holding the 2019 Meeting in a virtual format invites participation by a broader group of stockholders, while reducing the costs associated with an in-person meeting. This balance allows the 2019 Meeting to remain focused on matters directly relevant to the interests of stockholders in a way that makes efficient use of Company resources. To provide our stockholders with a similar level of transparency to the in-person meeting format, we will provide stockholders with the opportunity to submit questions through our pre-meeting forum located at www.proxyvote.com (using the Control Number included on your Notice or printed proxy card) and during the 2019 Meeting through the 2019 Meeting website.

Quorum and Voting

To hold our 2019 Meeting, we need a majority of the outstanding shares entitled to vote at the close of business on the March 25, 2019 record date, or a quorum, represented at the 2019 Meeting either by attendance online or by proxy. On March 25, 2019, there were 608,494,376 shares of common stock outstanding and entitled to vote, meaning that 304,247,189 shares must be represented at the 2019 Meeting or by proxy to have a quorum. A list of stockholders entitled to vote will be available for 10 days prior to the 2019 Meeting at our headquarters, 2788 San Tomas Expressway, Santa Clara, California. If you would like to view the stockholder list, please contact our Investor Relations Department with an electronic mail message to NVIDIAInvestorRelations@nvidia.com or at (408) 486-2000 to schedule an appointment.

Your shares will be counted towards the quorum only if you submit a valid proxy or vote at the 2019 Meeting. Abstentions and broker non-votes will be counted towards the quorum requirement. If there is not a quorum, a majority of the votes present may adjourn the 2019 Meeting to another date.

You may vote **FOR** any nominee to the Board, you may **WITHHOLD** your vote for any nominee or you may **ABSTAIN** from voting. For each other matter to be voted on, you may vote **FOR** or **AGAINST** or **ABSTAIN** from voting.

Stockholder of Record

You are a stockholder of record if your shares were registered directly in your name with our transfer agent, Computershare, on March 25, 2019, and can vote shares in any of the following ways:

- By attending the 2019 Meeting online and voting during the meeting;
- Via mail, by signing and mailing your proxy card to us before the 2019 Meeting; or
- By telephone or via the Internet, by following the instructions provided in the Notice or your proxy materials.

You may change your vote or revoke your proxy before the final vote at the 2019 Meeting in any of the following ways:

- Attend the 2019 Meeting online and vote during the meeting;
- Submit another proxy by telephone or via the Internet after you have already provided an earlier proxy;
- Submit another properly completed proxy card with a later date; or
- Send a written notice that you are revoking your proxy to NVIDIA Corporation, 2788 San Tomas Expressway, Santa Clara, California 95051, Attention: Timothy S. Teter, Secretary

If you do not vote using any of the ways described above, your shares will **not** be voted.

Street Name Holder

If your shares are held through a nominee, such as a bank or broker, as of March 25, 2019, then you are the beneficial owner of shares held in "street name," and you have the right to direct the nominee how to vote those shares for the 2019 Meeting. The nominee should provide you a separate Notice or voting instructions, and you should follow those instructions to tell the nominee how to vote. To vote by attending the 2019 Meeting online, you must obtain a valid proxy from your nominee.

If you are a beneficial holder and do not provide voting instructions to your nominee, the nominee will not be authorized to vote your shares on "non-routine" matters, including elections of directors (even if not contested), executive compensation (including any advisory stockholder votes on executive compensation) and amendments of charter documents. This is called a "broker non-vote." However, the nominee can still register your shares as being present at the 2019 Meeting for determining quorum, and the nominee will have discretion to vote for matters considered by the NYSE to be "routine," including the ratification of our independent registered public accounting firm. **Therefore, you MUST give your nominee instructions in order for your vote to be counted on the proposals to elect directors, to conduct an advisory approval of our executive compensation, and to amend and restate our Charter. We strongly encourage you to vote.**

Note that under the rules of the national stock exchanges, any NVIDIA stockholder whose shares are held in street name by a member brokerage firm may revoke a proxy and vote his or her shares at the 2019 Meeting only in accordance with applicable rules and procedures of those exchanges, as employed by the street name holder's brokerage firm.

Vote Count

On each matter to be voted upon, stockholders have one vote for each share of NVIDIA common stock owned as of March 25, 2019. Votes will be counted by the inspector of election as follows:

Proposal Number	Proposal Description	Vote Required for Approval	Effect of Abstentions	Effect of Broker Non-Votes
1	Election of twelve directors	Directors are elected if they receive more FOR votes than WITHHOLD votes	None	None
2	Approval of our executive compensation	FOR votes from the holders of a majority of shares present and entitled to vote on this matter	Against	None
3	Ratification of the selection of PwC as our independent registered public accounting firm for Fiscal 2020	FOR votes from the holders of a majority of shares present and entitled to vote on this matter	Against	None
4	Approval of an amendment and restatement of our Charter to eliminate supermajority voting for removal of a director without cause	FOR votes from the holders of at least 66 2/3% of outstanding shares	Against	Against

If you are a stockholder of record and you return a signed proxy card without marking any selections, your shares will be voted **FOR** each of the nominees listed in Proposal 1 and **FOR** the other proposals. If any other matter is properly presented at the 2019 Meeting, Jen-Hsun Huang or Timothy S. Teter as your proxyholder will vote your shares using his best judgment.

Vote Results

Preliminary voting results will be announced at the 2019 Meeting. Final voting results will be published in a current report on Form 8-K, which will be filed with the SEC by May 29, 2019.

Proxy Materials

As permitted by SEC rules, we are making our proxy materials available to stockholders electronically via the Internet at www.nvidia.com/proxy. On or about April 12, 2019, we sent stockholders who own our common stock at the close of business on March 25, 2019 (other than those who previously requested electronic or paper delivery) a Notice containing instructions on how to access our proxy materials, vote via the Internet or by telephone, and elect to receive future proxy materials electronically or in printed form by mail.

If you choose to receive future proxy materials electronically (via www.proxyvote.com for stockholders of record and www.icsdelivery.com/nvda for street name holders), you will receive an email next year with links to the proxy materials and proxy voting site.

SEC rules also permit companies and intermediaries, such as brokers, to satisfy Notice and proxy material delivery requirements for multiple stockholders with the same address by delivering a single Notice or set of proxy materials addressed to those stockholders. We follow this practice, known as “householding,” unless we have received contrary instructions from any stockholder at that address.

If you received more than one Notice or full set of proxy materials, then your shares are either registered in more than one name or are held in different accounts. Please vote the shares covered by each Notice or proxy card. To modify your instructions so that you receive one Notice or proxy card for each account or name, please contact your broker. Your “householding” election will continue until you are notified otherwise or until you revoke your consent.

To make a change regarding the form in which you receive proxy materials (electronically or in print), or to request receipt of a separate set of documents to a household, contact our Investor Relations Department (through our website at www.nvidia.com, with an electronic mail message to NVIDIAInvestorRelations@nvidia.com, or by mail at 2788 San Tomas Expressway, Santa Clara, California 95051).

We will pay the entire cost of soliciting proxies. Our directors and employees may also solicit proxies in person, by telephone, by mail, via the Internet or by other means of communication. Our directors and employees will not be paid any additional compensation for soliciting proxies. We have also retained MacKenzie Partners on an advisory basis for a fee not expected to exceed \$20,000 and they may help us solicit proxies from brokers, bank nominees and other institutional owners. We may also reimburse brokerage firms, banks and other agents for the cost of forwarding proxy materials to beneficial owners.

2020 Meeting Stockholder Proposals

To be considered for inclusion in next year’s proxy materials, your proposal must be submitted in writing by December 14, 2019 to NVIDIA Corporation, 2788 San Tomas Expressway, Santa Clara, California 95051, Attention: Timothy S. Teter, Secretary and must comply with all applicable requirements of Rule 14a-8 promulgated under the Exchange Act. However, if we do not hold our 2020 Meeting between April 22, 2020 and June 21, 2020, then the deadline is a reasonable time before we begin to print and send our proxy materials. If you wish to submit a proposal for consideration at the 2020 Meeting that is not to be included in next year’s proxy materials, you must do so in writing following the above instructions not later than the close of business on February 22, 2020, and not earlier than January 23, 2020. We also advise you to review our Bylaws, which contain additional requirements about advance notice of stockholder proposals and director nominations.

Proposal 1—Election of Directors

What am I voting on? Electing the 12 director nominees identified below to hold office until the 2020 Meeting and until his or her successor is elected or appointed.

Vote required: Directors are elected if they receive more **FOR** votes than **WITHHOLD** votes.

Our Board has 12 members. All of our directors have one-year terms and stand for election annually. Our nominees include 11 independent directors, as defined by the rules and regulations of Nasdaq, and one NVIDIA officer: Mr. Huang, who serves as our President and CEO. Each of the nominees listed below, other than Mr. Neal, is currently a director of NVIDIA previously elected by our stockholders.

The Board expects the nominees will be available for election. If a nominee declines or is unable to act as a director, your proxy may be voted for any substitute nominee proposed by the Board or the size of the Board may be reduced.

Recommendation of the Board

The Board recommends that you vote **FOR** the election of each of the following nominees:

Name	Age	Director Since	Occupation	Independent	Other Public Company Boards
Robert K. Burgess	61	2011	Independent Consultant	✓	2 ⁽²⁾
Tench Coxe	61	1993	Managing Director, Sutter Hill Ventures	✓	1

Michael G. McCaffery	65	2015	Chairman & Managing Director, Makena Capital Management	✓	–
Stephen C. Neal	70	2019	Chairman, Cooley LLP	✓	1
Mark L. Perry ⁽¹⁾	63	2005	Independent Consultant	✓	2
A. Brooke Seawell	71	1997	Venture Partner, New Enterprise Associates	✓	2
Mark A. Stevens	59	2008 ⁽³⁾	Managing Partner, S-Cubed Capital	✓	1

⁽¹⁾ Lead Director

⁽²⁾ Mr. Burgess is not seeking re-election to Adobe Inc.'s board of directors effective as of Adobe's 2019 annual meeting

⁽³⁾ Mr. Stevens previously served as a member of our Board from 1993 until 2006

Director Qualifications and Nomination of Directors

The NCGC identifies, reviews and assesses the qualifications of existing and potential directors and selects nominees for recommendation to the Board for approval. They seek to ensure that the Board is composed of directors who exhibit a variety of skills, education, professional experience and backgrounds, as well as bring diverse viewpoints and perspectives. The NCGC may conduct any appropriate and necessary inquiries into the backgrounds and qualifications of possible candidates. The NCGC may also engage a professional search firm to identify and assist the NCGC in identifying, evaluating, and conducting due diligence on potential director nominees. The NCGC has not established specific age, gender, education, experience, or skill requirements for potential members, and instead considers numerous factors regarding the nominee in light of our current and future business models, including the following:

- Integrity and candor
- Independence
- Senior management and operational experience
- Professional, technical and industry knowledge
- Financial expertise
- Financial community experience (including as an investor in other companies)
- Marketing and brand management
- Public company board experience
- Experience with emerging technologies and new business models
- Legal expertise
- Diversity, including gender and ethnic background
- Experience in academia
- Willingness and ability to devote substantial time and effort to Board responsibilities and Company oversight
- Ability to represent the interests of the stockholders as a whole rather than special interest groups or constituencies
- All relationships between the proposed nominee and any of our stockholders, competitors, customers, suppliers or other persons with a relationship to NVIDIA
- Overall service to NVIDIA, including past attendance at Board and committee meetings and participation and contributions to the activities of the Board

The NCGC and the Board understand the importance of Board refreshment, and strive to maintain an appropriate balance of tenure, diversity, and skills on the Board. While the Board benefits from the experience and institutional knowledge that our longer-serving directors bring, it has also brought in new perspectives and ideas by appointing three new directors in the last four years, including, most recently in 2019, Mr. Neal, a veteran attorney and corporate advisor. Our longer-tenured directors are familiar with our operations and business areas and have the perspective of overseeing our activities from a variety of economic and competitive environments. Our newer directors bring expertise in consumer marketing, branding, technology developments at leading academic institutions, and deep knowledge from decades of advising numerous companies that are important to supporting NVIDIA as it competes in new markets and as it faces new regulatory and legal challenges. Each year, the NCGC and Board review each director's individual performance, including the director's past contributions, outside experiences and activities, and committee participation, and make a determination concerning how his or her experience and skills continue to add value to NVIDIA and the Board.

The following chart summarizes the skills and competencies of each director nominee that led our Board to conclude that he or she is qualified to serve on our Board. The lack of a check does not mean the director lacks that skill or qualification; rather, a check indicates a specific area of focus or expertise for which the Board relies on such director nominee most.

	Senior Management and Operations <i>provides experienced oversight of our business and with new insights</i>	Industry and Technical <i>facilitates an understanding of innovations and a technical assessment of our products and services</i>	Financial/Financial Community <i>assists with review of our operations and financial matters; those with a venture capital background offer shareholder perspectives</i>	Public Company Board <i>helps identify challenges and risks we face as a public company</i>	Emerging Technologies and Business Models <i>integral to our growth strategies given our unique business model</i>	Marketing and Brand Management <i>offers guidance on our products directly marketed to consumers</i>	Legal <i>important as we are subject to multiple lawsuits, regulatory matters, and new regulations</i>

The NCGC evaluates candidates proposed by stockholders using the same criteria as it uses for other candidates. Stockholders seeking to recommend a prospective nominee should follow the instructions under *Stockholder Communications with the Board of Directors* below. Stockholder submissions must include the full name of the proposed nominee, a description of the proposed nominee's business experience for at least the previous five years, complete biographical information, a description of the proposed nominee's qualifications as a director and a representation that the nominating stockholder is a beneficial or record owner of our stock. Any such submission must be accompanied by the written consent of the proposed nominee to be named as a nominee and to serve as a director if elected.

In addition, our Board voluntarily adopted proxy access. As a result, our Bylaws provide that under certain circumstances, information regarding a director candidate or candidates nominated by a stockholder or group of stockholders will be included in our proxy statement. Information will be included regarding the greater of two candidates or 20% of the number of directors in office on the last day that a submission may be delivered, if nominated by a stockholder (or group of up to 20 stockholders) owning at least 3% of the voting power of our outstanding capital stock, continuously for at least three years. The stockholder or group must provide timely written notice of such nomination and the stockholder(s) and nominee must satisfy the other requirements specified in our Bylaws.

The above summary of our proxy access rules is not intended to be complete and is subject to limitations set forth in our Bylaws and Corporate Governance Policies. Stockholders are advised to review these documents, which contain the requirements for director nominations. The NCGC did not receive any stockholder nominations during Fiscal 2019.

Our Director Nominees

The biographies below include information, as of the date of this proxy statement, regarding the particular experience, qualifications, attributes or skills of each director, relative to the skills matrix above, that led the NCGC and Board to believe that he or she should continue to serve on the Board.

ROBERT K. BURGESS

Independent Consultant

Age: 61

Director Since: 2011

Committees: CC

Independent Director

Financial Expert

Robert K. Burgess has served as an independent investor and board member to technology companies since 2005. He was chief executive officer from 1996 to 2005 of Macromedia, Inc., a provider of internet and multimedia software, which was acquired by Adobe Systems Incorporated; he also served from 1996 to 2005 on its board of directors, as chairman of its board of directors from 1998 to 2005 and as executive chairman for his final year. Previously, he held key executive positions from 1984 to 1991 at Silicon Graphics, Inc. (SGI), a graphics and computing company; from 1991 to 1995, served as chief executive officer and a board member of Alias Research, Inc., a publicly traded 3D software company, until its acquisition by SGI; and resumed executive positions at SGI during 1996. Mr. Burgess serves on the board of Adobe⁽¹⁾ and Rogers Communications Inc., a communications and media company, and has served on the boards of several privately-held companies. He was a director of IMRIS Inc., a provider of image guided therapy solutions, from 2010 until 2013. He holds a BCom degree from McMaster University.

Mr. Burgess brings to the Board senior management and operating experience and expertise in the areas of financial- and risk-management. He has a broad understanding of the roles and responsibilities of a corporate board and provides valuable insight on a range of issues in the technology industry.

⁽¹⁾ Mr. Burgess is not seeking re-election to Adobe's board of directors effective as of Adobe's 2019 annual meeting

TENCH COXE

**Managing Director,
Sutter Hill Ventures**

Age: 61

Director Since: 1993

Committees: CC

Independent Director

Tench Coxe has been a managing director of Sutter Hill Ventures, a venture capital investment firm, since 1989, where he focuses on investments in the IT sector. Prior to joining Sutter Hill Ventures in 1987, he was director of marketing and MIS at Digital Communication Associates. He serves on the board of directors of Artisan Partners Asset Management Inc., an institutional money management firm, and several privately held technology companies. He served on the board of directors of Mattersight Corp., a customer loyalty software firm from 2000 to 2018. Mr. Coxe holds a BA degree in Economics from Dartmouth College and an MBA degree from Harvard Business School.

Mr. Coxe brings to the Board expertise in financial and transactional analysis and provides valuable perspectives on corporate strategy and emerging technology trends. His significant financial community experience gives the Board an understanding of the methods by which companies can increase value for their stockholders.

PERSIS S. DRELL

Provost, Stanford University

Age: 63

Director Since: 2015

Committees: CC

Independent Director

Persis S. Drell has been the Provost of Stanford University since 2017. A Professor of Materials Science and Engineering and Professor of Physics, Dr. Drell has been on the faculty at Stanford since 2002, and was the Dean of the Stanford School of Engineering from 2014 to 2017. She served as the Director of the U.S. Department of Energy SLAC National Accelerator Laboratory from 2007 to 2012. Dr. Drell is a member of the National Academy of Sciences and the American Academy of Arts and Sciences, and is a fellow of the American Physical Society. She has been the recipient of a Guggenheim Fellowship and a National Science Foundation Presidential Young Investigator Award. Dr. Drell holds a Ph.D. from the University of California Berkeley and an AB degree in Mathematics and Physics from Wellesley College.

An accomplished researcher and educator, Dr. Drell brings to the Board expert leadership in guiding innovation in science and technology.

JAMES C. GAITHER

**Managing Director, Sutter
Hill Ventures**

Age: 81

Director Since: 1998

Committees: NCGC

Independent Director

James C. Gaither has been a partner of Sutter Hill Ventures, a venture capital investment firm, since 2000. He was a partner in the law firm Cooley LLP from 1971 to 2000 and senior counsel to the firm from 2000 to 2003. Prior to practicing law, he served as a law clerk to The Honorable Earl Warren, Chief Justice of the United States Supreme Court, special assistant to the Assistant Attorney General in the U.S. Department of Justice and staff assistant to U.S. President Lyndon Johnson. Mr. Gaither is a former president of the Board of Trustees at Stanford University, former vice chairman of the board of directors of The William and Flora Hewlett Foundation and past chairman of the Board of Trustees of the Carnegie Endowment for International Peace. Mr. Gaither holds a BA degree in Economics from Princeton University and a JD degree from Stanford University Law School.

Mr. Gaither brings to the Board expertise in corporate strategy and negotiating complex transactions. He also provides valuable perspectives on the roles and responsibilities of a corporate board, including oversight of a public company's legal and regulatory compliance and engagement with regulatory authorities. His significant financial community experience gives the Board an understanding of the methods by which companies can increase value for their stockholders.

**JEN-HSUN HUANG****President and Chief Executive Officer, NVIDIA Corporation****Age:** 56**Director Since:** 1993**Committees:** None

Jen-Hsun Huang co-founded NVIDIA in 1993 and has since served as president, chief executive officer, and a member of the board of directors. Mr. Huang held a variety of positions from 1985 to 1993 at LSI Logic Corp., a computer chip manufacturer, including leading the business unit responsible for the company's system-on-a-chip strategy. He was a microprocessor designer from 1984 to 1985 at Advanced Micro Devices, Inc., a semiconductor company. Mr. Huang holds a BSEE degree from Oregon State University and an MSEE degree from Stanford University.

Mr. Huang is one of the technology industry's most respected executives, having taken NVIDIA from a startup to a world leader in visual computing. Under his guidance, NVIDIA has compiled a record of consistent innovation and sharp execution, marked by products that have gained strong market share.

**DAWN HUDSON****Independent Consultant****Age:** 61**Director Since:** 2013**Committees:** AC**Independent Director****Financial Expert**

Dawn Hudson serves on the boards of various companies. From 2014 to 2018, Ms. Hudson served as Chief Marketing Officer for the National Football League. Previously, she served from 2009 to 2014 as vice chairman of The Parthenon Group, an advisory firm focused on strategy consulting. She was president and chief executive officer of Pepsi-Cola North America, the beverage division of PepsiCo, Inc. for the U.S. and Canada, from 2005 to 2007 and president from 2002, and simultaneously served as chief executive officer of the foodservice division of PepsiCo, Inc. from 2005 to 2007. Previously, she spent 13 years in marketing, advertising and branding strategy, holding leadership positions at major agencies, such as D'Arcy Masius Benton & Bowles and Omnicom. Ms. Hudson currently serves on the board of directors of The Interpublic Group of Companies, Inc., an advertising holding company. She was a director of P.F. Chang's China Bistro, Inc., a restaurant chain, from 2010 until 2012; of Allergan, Inc., a biopharmaceutical company, from 2008 until 2014; of Lowes Companies, Inc., a home improvement retailer, from 2001 until 2015; and of Amplify Snack Brands, Inc., a snack food company, from 2014 until 2018. She holds a BA degree in English from Dartmouth College.

Ms. Hudson brings to the board experience in executive leadership. As a longtime marketing executive, she has valuable expertise and insights in leveraging brands, brand development and consumer behavior. She also has considerable corporate governance experience, gained from more than 10 years of serving on the boards of public companies.

HARVEY C. JONES

Managing Partner, Square Wave Ventures

Age: 66

Director Since: 1993

Committees: CC, NCGC

Independent Director

Financial Expert

Harvey C. Jones has been the managing partner of Square Wave Ventures, a private investment firm, since 2004. Mr. Jones has been an entrepreneur, high technology executive and active venture investor for over 30 years. In 1981, he co-founded Daisy Systems Corp., a computer-aided engineering company, ultimately serving as its president and chief executive officer until 1987. Between 1987 and 1998, he led Synopsys, Inc., a major electronic design automation company, serving as its chief executive officer for seven years and then as executive chairman. In 1997, Mr. Jones co-founded Tensilica Inc., a privately held technology IP company that developed and licensed high performance embedded processing cores. He served as chairman of the Tensilica board of directors from inception through its 2013 acquisition by Cadence Design Systems, Inc. In 2016, Mr. Jones joined the board of directors of and invested in TempoQuest, a private company seeking to develop advanced weather forecasting systems that exploit accelerated GPU technology. He was a director of Tintri Inc., a company that builds data storage solutions for virtual and cloud environments, from 2014 until 2018. Mr. Jones holds a BS degree in Mathematics and Computer Sciences from Georgetown University and an MS degree in Management from Massachusetts Institute of Technology.

Mr. Jones brings to the board an executive management background, an understanding of semiconductor technologies and complex system design. He provides valuable insight into innovation strategies, research and development efforts, as well as management and development of our technical employees. His significant financial community experience gives the Board an understanding of the methods by which companies can increase value for their stockholders.

MICHAEL G. McCAFFERY

Chairman and Managing Director, Makena Capital Management

Age: 65

Director Since: 2015

Committees: AC

Independent Director

Financial Expert

Michael G. McCaffery is the Chairman and a Managing Director of Makena Capital Management, an investment management firm. From 2005 to 2013, he was the Chief Executive Officer of Makena Capital Management. From 2000 to 2006, he was the President and Chief Executive Officer of the Stanford Management Company, the university subsidiary charged with managing Stanford University's financial and real estate investments. Prior to Stanford Management Company, Mr. McCaffery was President and Chief Executive Officer of Robertson Stephens and Company, a San Francisco-based investment bank and investment management firm, from 1993 to 2009, and also served as Chairman in 2000. Mr. McCaffery serves on the board of directors, or on the advisory boards, of several privately held companies and non-profits. He was a director of KB Home, a homebuilding company, from 2003 until 2015. He holds a BA degree from the Woodrow Wilson School of Public and International Affairs at Princeton University, a BA Honours degree and an MA degree in Politics, Philosophy and Economics from Merton College, Oxford University, Oxford, England, and an MBA degree from the Stanford Graduate School of Business.

Mr. McCaffery brings to the Board a broad array of business, investment and real estate experience and recognized expertise in financial matters, as well as a demonstrated commitment to good corporate governance.

**STEPHEN C. NEAL****Chairman, Cooley LLP****Age:** 70**Director Since:** 2019**Committees:** None**Independent Director**

Stephen C. Neal serves as Chairman of the law firm Cooley LLP, where he was also Chief Executive Officer from 2001 until 2008. In addition to his extensive experience as a trial lawyer on a broad range of corporate issues, Mr. Neal has represented and advised numerous boards of directors, special committees of boards and individual directors on corporate governance and other legal matters. Prior to joining Cooley in 1995, Mr. Neal was a partner of the law firm Kirkland & Ellis LLP. Mr. Neal serves as Chairman of the board of directors of Levi Strauss & Co., an apparel company. Mr. Neal holds an AB degree from Harvard University and a JD degree from Stanford Law School.

Mr. Neal brings to the Board deep knowledge and broad experience in corporate governance as well as his perspectives drawn from advising many companies throughout his career.

**MARK L. PERRY****Independent Consultant****Age:** 63**Director Since:** 2005**Committees:** AC, NCGC**Lead Independent Director****Financial Expert**

Mark L. Perry serves on the boards of, and consults for, various companies and non-profit organizations. From 2012 to 2013, Mr. Perry served as an Entrepreneur-in-Residence at Third Rock Ventures, a venture capital firm. He served from 2007 to 2011 as president and chief executive officer of Aerovance, Inc., a biopharmaceutical company. He was an executive officer from 1994 to 2004 at Gilead Sciences, Inc., a biopharmaceutical company, serving in a variety of capacities, including general counsel, chief financial officer, and executive vice president of operations, responsible for worldwide sales and marketing, legal, manufacturing and facilities; he was also its senior business advisor until 2007. From 1981 to 1994, Mr. Perry was with the law firm Cooley LLP, where he was a partner for seven years. He serves on the board of directors and as lead independent director of Global Blood Therapeutics, Inc. and on the board of directors and as chairman of MyoKardia, Inc., both biopharmaceutical companies. Mr. Perry holds a BA degree in History from the University of California, Berkeley, and a JD degree from the University of California, Davis.

Mr. Perry brings to the Board operating and finance experience gained in a large corporate setting. He has varied experience in legal affairs and corporate governance, and a deep understanding of the roles and responsibilities of a corporate board.

**A. BROOKE SEAWELL****Venture Partner, New Enterprise Associates****Age:** 71**Director Since:** 1997**Committees:** CC**Independent Director****Financial Expert**

A. Brooke Seawell has served since 2005 as a venture partner at New Enterprise Associates, and was a partner from 2000 to 2005 at Technology Crossover Ventures. He was executive vice president from 1997 to 1998 at NetDynamics, Inc., an application server software company, which was acquired by Sun Microsystems, Inc. He was senior vice president and chief financial officer from 1991 to 1997 of Synopsys, Inc., an electronic design automation software company. He serves on the board of directors of Tableau Software, Inc., a business intelligence software company, Tenable, Inc., a cybersecurity company, and several privately held companies. Mr. Seawell served on the board of directors of Glu Mobile, Inc., a publisher of mobile games, from 2006 to 2014, and of Informatica Corp., a data integration software company, from 1997 to 2015. He also previously served as a member of the Stanford University Athletic Board and on the Management Board of the Stanford Graduate School of Business. Mr. Seawell holds a BA degree in Economics and an MBA degree in Finance from Stanford University.

Mr. Seawell brings to the Board operational expertise and senior management experience, including knowledge of the complex issues facing public companies, and a deep understanding of accounting principles and financial reporting. His significant financial community experience gives the Board an understanding of the methods by which companies can increase value for their stockholders.

**MARK A. STEVENS****Managing Partner, S-Cubed Capital****Age:** 59**Director Since:** 2008
(previously served 1993-2006)**Committees:** AC, NCGC**Independent Director**

Mark A. Stevens has been the managing partner of S-Cubed Capital, a private family office investment firm, since 2012. He was a managing partner from 1993 to 2011 of Sequoia Capital, a venture capital investment firm, where he had been an associate for the preceding four years. Previously, he held technical sales and marketing positions at Intel Corporation, and was a member of the technical staff at Hughes Aircraft Co. Mr. Stevens serves as a member of the board of directors of Quantenna Communications, Inc., a provider of Wi-Fi solutions and is a Trustee of the University of Southern California. Mr. Stevens holds a BSEE degree, a BA degree in Economics and an MS degree in Computer Engineering from the University of Southern California and an MBA degree from Harvard Business School.

Mr. Stevens brings to the Board a deep understanding of the technology industry, and the drivers of structural change and high-growth opportunities. He provides valuable insight regarding corporate strategy development and the analysis of acquisitions and divestitures. His significant financial community experience gives the Board an understanding of the methods by which companies can increase value for their stockholders.

Information About the Board of Directors and Corporate Governance

Independence of the Members of the Board of Directors

Nasdaq rules and our Corporate Governance Policies require that a majority of our directors not have a relationship that would interfere with their exercise of independent judgment in carrying out their responsibilities and meet any other qualification requirements required by the SEC and Nasdaq. After considering all relevant relationships and transactions, our Board determined that all of our directors are “independent” as defined by Nasdaq’s rules and regulations, except for Mr. Huang. The Board also determined that all members of our AC, CC and NCGC are independent under applicable Nasdaq listing standards. In addition, Messrs. McCaffery and Perry and Ms. Hudson of the AC are “audit committee financial experts” based on SEC rules.

Board Leadership Structure

Our Board believes that all of its members should have an equal voice in the affairs and the management of NVIDIA, and therefore, our stockholders are best served at this time by having an independent Lead Director, who is an integral part of our Board structure and a critical aspect of our effective corporate governance, rather than having a chairperson. The independent directors consider the role and designation of the Lead Director on an annual basis, and Mr. Perry was appointed as our Lead Director in 2018. In addition, Mr. Perry serves on both the NCGC and the AC, which affords him increased engagement with Board governance and composition as well as with risk assessment and management, and financial and regulatory matters of the Company. While the CEO has primary responsibility for preparing the agendas for Board meetings and presiding over the portion of the meetings of the Board where he is present, our Lead Director has significant responsibilities, which are set forth in our Corporate Governance Policies, and include, in part:

- Determining an appropriate schedule of Board meetings, and seeking to ensure that the independent members of the Board can perform their duties responsibly while not interfering with the flow of our operations;
- Working with the CEO, and seeking input from all directors and other relevant management, as to the preparation of the agendas for Board meetings;
- Advising the CEO on a regular basis as to the quality, quantity and timeliness of the flow of information requested by the Board from our management with the goal of providing what is necessary for the independent members of the Board to effectively and responsibly perform their duties, and, although our management is responsible for the preparation of materials for the Board, the Lead Director may specifically request the inclusion of certain material; and
- Coordinating, developing the agenda for, and moderating executive sessions of the independent members of the Board, and acting as principal liaison between them and the CEO on sensitive issues.

The active involvement of our independent directors, combined with the qualifications and significant responsibilities of our Lead Director, provide balance on the Board and promote strong, independent oversight of our management and affairs.

Role of the Board in Risk Oversight

The Board is responsible for overseeing risk management at NVIDIA and delegates oversight of appropriate topics to its committees. Our AC has the responsibility to consider and discuss our major financial risk exposures and the steps our management has taken to monitor and control these exposures. The AC also monitors compliance with certain legal and regulatory requirements and oversees the performance of our internal audit function. Our NCGC monitors the effectiveness of our anonymous tip process and corporate governance guidelines, including whether they are successful in preventing illegal or improper liability-creating conduct, and oversees environmental, social and corporate governance risks, ranging from artificial intelligence to diversity and inclusion. Our CC assesses and monitors whether any of our compensation policies and programs has the potential to encourage excessive risk-taking. The Board exercises direct oversight of strategic risks to NVIDIA and other risk areas not delegated to one of its committees, including business continuity and cybersecurity.

Management periodically provides information, including guidance on risk management and mitigation, to the Board or a relevant committee. Each committee also reports to the Board on those matters.

Corporate Governance Policies of the Board of Directors

The Board has documented our governance practices by adopting Corporate Governance Policies to ensure that the Board will have the necessary authority and processes in place to review and evaluate our business operations as needed and to make decisions that are independent of our management. Our Corporate Governance Policies set forth the practices the Board follows with respect to board composition and selection, regular evaluations of the Board and its committees, board meetings and involvement of senior management, chief executive officer performance evaluation, and board committees and compensation. Our Corporate Governance Policies may be viewed under Corporate Governance in the Investor Relations section of our website at www.nvidia.com.

Executive Sessions of the Board

As required under Nasdaq's listing standards, our independent directors have in the past met, and will continue to meet, regularly in scheduled executive sessions at which only independent directors are present. In Fiscal 2019, our independent directors met in executive session at all four of our scheduled quarterly Board meetings.

In addition, independent directors have in the past met, and will continue to meet, regularly in scheduled executive sessions with our CEO. In Fiscal 2019, our independent directors met in executive session with the CEO at all four of our scheduled quarterly Board meetings.

Director Attendance at Annual Meeting

We do not have a formal policy regarding attendance by members of the Board at our annual meetings. We generally schedule a Board meeting in conjunction with our annual meeting and expect that all of our directors will attend each annual meeting, absent a valid reason. All of our Board members as of the 2018 Meeting attended our 2018 Meeting.

Board Self-Assessments

In Fiscal 2019, the NCGC oversaw an evaluation process, conducted at least annually, whereby outside corporate counsel for NVIDIA interviewed each director to obtain his or her evaluation of the Board as a whole, and of the committees on which he or she serves. The interviews solicited ideas from the directors about, among other things, improving quality of Board and/or committee oversight effectiveness regarding strategic direction, financial and audit matters, executive compensation and other key matters. The interviews also focused on Board process and identifying specific issues which should be discussed in the future. After these evaluations were complete, our outside corporate counsel summarized the results, reviewed with our Lead Director, and then submitted the summary for discussion by the NCGC.

In response to the evaluations conducted in Fiscal 2019, director recruitment was prioritized and resulted in the appointment of Mr. Neal in March 2019.

Director Orientation and Continuing Education

The NCGC and our General Counsel are responsible for director orientation programs and for director continuing education programs. Continuing education programs for directors may include a combination of internally developed materials and presentations, programs presented by third parties, and financial and administrative support for attendance at qualifying academic or other independent programs.

Director Stock Ownership Guidelines

The Board believes that directors should hold a significant equity interest in NVIDIA. Our Corporate Governance Policies require each non-employee director to hold a number of shares of our common stock with a value equal to six times the annual cash retainer for Board service during the period in which he or she serves as a director (or six times the base salary, in the case of the CEO). The shares may include vested deferred stock, shares held in trust and shares held by immediate family members. Non-employee directors have five years after their Board appointment to reach the ownership threshold. Our stock ownership guidelines are intended to further align director interests with stockholder interests.

Each of our non-employee directors and Mr. Huang currently meets or exceeds the stock ownership requirements, with the exception of Mr. Neal, who joined our Board in March 2019.

Hedging and Pledging Policy

Our directors and executive officers may not hedge their ownership of NVIDIA stock, including trading in options, puts, calls, or other derivative instruments related to NVIDIA stock or debt. Directors and executive officers may not purchase NVIDIA stock on margin, borrow against NVIDIA stock held in a margin account, or pledge NVIDIA stock as collateral for a loan.

Outside Advisors

The Board and each of its principal committees may retain outside advisors and consultants of their choosing at our expense. The Board need not obtain management's consent to retain outside advisors. In addition, the principal committees need not obtain either the Board's or management's consent to retain outside advisors.

Code of Conduct

We expect our directors, executives and employees to conduct themselves with the highest degree of integrity, ethics and honesty. Our credibility and reputation depend upon the good judgment, ethical standards and personal integrity of each director, executive and employee. We have a Code of Conduct that applies to our executive officers, directors and employees, including our principal executive officer, principal financial officer and principal accounting officer. We also have a Financial Team Code of Conduct that applies to our executive officers, directors and members of our finance department. We regularly review our Code of Conduct and related policies to ensure that they provide clear guidance to our directors, executives and employees.

The Code of Conduct and the Financial Team Code of Conduct are available under Corporate Governance in the Investor Relations section of our website at www.nvidia.com. If we make any amendments to the Code of Conduct or the Financial Team Code of Conduct or grant any waiver from a provision of either code to any executive officer or director, we will promptly disclose the nature of the amendment or waiver on our website.

Corporate Hotline

We have established an independent corporate hotline to allow any employee to confidentially and anonymously lodge a complaint about any accounting, internal control, auditing, Code of Conduct or other matter of concern (unless prohibited by local privacy laws for employees located in the European Union).

Stockholder Communications with the Board of Directors

Stockholders who wish to communicate with the Board regarding nominations of directors or other matters may do so by sending written communications addressed to Timothy S. Teter, our Secretary, at NVIDIA Corporation, 2788 San Tomas Expressway, Santa Clara, California 95051. All stockholder communications we receive that are addressed to the Board will be compiled by our Secretary. If no particular director is named, letters will be forwarded, depending on the subject matter, to the chairperson of the AC, CC or NCGC. Matters put forth by our stockholders will be reviewed by the NCGC, which will determine whether these matters should be presented to the Board. The NCGC will give serious consideration to all such matters and will make its determination in accordance with its charter and applicable laws.

Majority Vote Standard

Our Bylaws provide that in a non-contested election if the votes cast **FOR** an incumbent director do not exceed the number of **WITHHOLD** votes, such incumbent director shall promptly tender his or her resignation to the Board. The NCGC will then review the circumstances surrounding the **WITHHOLD** vote and promptly make a recommendation to the Board on whether to accept or reject the resignation or whether other action should be taken. The Board will act on the NCGC's recommendation and publicly disclose its decision and the rationale behind it within 90 days from the date of certification of the stockholder vote.

In a contested election, which is an election in which the number of nominees exceeds the number of directors to be elected, our directors will be elected by a plurality of the shares represented at any such meeting or by proxy and entitled to vote on the election of directors at that meeting. Under this provision, the directors receiving the greatest number of **FOR** votes will be elected.

Board Meeting Information

The Board met seven times during Fiscal 2019, including meetings during which the Board discussed the strategic direction of NVIDIA, explored and discussed new business opportunities and the product roadmap, and other matters facing NVIDIA. We expect each Board member to attend each meeting of the Board and the committees on which he or she serves. Each Board member attended 75% or more of the meetings of the Board and of each committee on which he or she served.

Committees of the Board of Directors

The Board has three standing committees: an AC, a CC and a NCGC. Each of these committees operates under a written charter, which may be viewed under Corporate Governance in the Investor Relations section of our website at www.nvidia.com.

The composition and various functions of our committees are set forth below. Committee assignments are determined based on background and the expertise which individual directors can bring to a committee. Our Board believes that rotations among committees are a good corporate governance practice which both allows its members to be more fully informed regarding the full scope of the Board and our activities, and benefits each committee and the Board as a whole, as a result of diverse perspectives and ideas that are introduced through new committee formations. In February 2019, upon the recommendations of the NCGC, the Board examined the composition and chairmanship of the Board's committees and determined to maintain the current composition of the Board's committees for Fiscal 2020. The Board intends to make periodic rotations in the future.

AC

Michael G. McCaffery (Chair), Dawn Hudson, Mark L. Perry, and Mark A. Stevens

In Fiscal 2019, the AC met 7 times and selected highlights from its agenda topics included: discussions on the impact of tax reform, the Company's cash usage and strategy, oversight of PwC's partner rotation, and facilities and information technology reviews.

Committee Role and Responsibilities

- Oversees our corporate accounting and financial reporting process;
- Oversees our internal audit function;
- Determines and approves the engagement, retention and termination of the independent registered public accounting firm, or any new independent registered public accounting firm;
- Evaluates the performance of and assesses the qualifications of our independent registered public accounting firm;
- Reviews and approves the retention of the independent registered public accounting firm to perform any proposed permissible non-audit services;
- Confers with management and our independent registered public accounting firm regarding the results of the annual audit, the results of our quarterly financial statements and the effectiveness of internal control over financial reporting;
- Reviews the financial statements to be included in our quarterly report on Form 10-Q and annual report on Form 10-K;
- Reviews earnings press releases, as well as the substance of financial information and earnings guidance provided to analysts on our quarterly earnings calls;
- Prepares the report required to be included by SEC rules in our annual proxy statement or Form 10-K; and
- Establishes procedures for the receipt, retention and treatment of complaints we receive regarding accounting, internal accounting controls or auditing matters and the confidential and anonymous submission by employees of concerns regarding questionable accounting or auditing matters.

CC

Robert K. Burgess (Chair), Tench Coxe, Persis S. Drell, Harvey C. Jones, and A. Brooke Seawell

In Fiscal 2019, the CC met 5 times and selected highlights from its agenda topics included: executive and employee compensation practices, particularly in light of fluctuating market conditions, and the Company's share usage and strategy.

Committee Role and Responsibilities

- Reviews and approves our overall compensation strategy and policies;
- Reviews and recommends to the Board the compensation of our Board members;
- Reviews and approves the compensation and other terms of employment of Mr. Huang and other executive officers;
- Reviews and approves corporate performance goals and objectives relevant to the compensation of our executive officers and other senior management;
- Reviews and approves the disclosure contained in CD&A and for inclusion in the proxy statement and Form 10-K;
- Administers our stock purchase plans, variable compensation plans and other similar programs; and
- Assesses and monitors whether our compensation policies and programs have the potential to encourage excessive risk-taking.

NCGC

Harvey C. Jones (Chair), James C. Gaither, Mark L. Perry, and Mark A. Stevens

In Fiscal 2019, the NCGC met 4 times and selected highlights from its agenda topics included: consideration of Board recruiting matters; the Company's environmental, social, and corporate governance efforts, particularly with respect to artificial intelligence; and addressing stockholder concerns. In early Fiscal 2020, the NCGC also reviewed the Company's diversity and inclusion initiatives and prioritized director recruiting, resulting in the appointment of Mr. Neal to our Board.

Committee Role and Responsibilities

- Identifies, reviews and evaluates candidates to serve as directors;
- Recommends candidates for election to our Board;
- Makes recommendations to the Board regarding committee membership and chairs;
- Assesses the performance of the Board and its committees;
- Reviews and assesses our corporate governance principles and practices;
- Monitors changes in corporate governance practices and rules and regulations;
- Approves related party transactions;
- Reviews and assesses our environmental, social and corporate governance matters periodically;
- Establishes procedures for the receipt, retention and treatment of complaints we receive regarding violations of our Code of Conduct; and
- Monitors the effectiveness of our anonymous tip process.

Director Compensation

The CC reviews our non-employee director compensation program each year with the assistance of Exequity, who prepares a comprehensive assessment of our program, including comparison to our Fiscal 2018 peer group used for executive compensation purposes, an update on recent trends in director compensation, and a review of related corporate governance best practices. Following this review, the CC recommended no changes to our non-employee director compensation program for the year starting on the date of our 2018 Meeting.

The CC subsequently recommended, and the Board approved, a mix of cash and equity awards with an approximate annual value of \$300,000, which was slightly below the median total annual compensation paid by similarly-sized technology peer companies to their non-employee directors. We do not pay additional fees for serving as a chairperson or member of Board committees or for meeting attendance. Directors who are also employees do not receive fees or equity compensation for service on the Board. Discussion of Mr. Neal's compensation is not included, as he was appointed to our Board in March 2019.

Cash Compensation

The cash portion of the annual retainer, representing \$75,000 on an annualized basis, was paid quarterly.

Equity Compensation

The value of the equity award, in the form of RSUs, was \$225,000. The number of shares subject to each RSU award equaled this value, divided by the average closing market price of our common stock over the 60 calendar days ending the business day before the 2018 Meeting. The RSUs were granted on the first trading day following the date of our 2018 Meeting.

To correlate the vesting of the RSUs to the non-employee directors' service on the Board and its committees over the following year, the RSUs vested as to 50% on November 21, 2018 (the third Wednesday in November 2018) and will vest as to the remaining 50% on May 15, 2019 (the third Wednesday in May 2019). If a non-employee director's service terminates due to death, his or her RSU grants will immediately vest in full for the benefit of his or her beneficiary. Non-employee directors do not receive dividend equivalents on unvested RSUs.

Deferral of Settlement

Non-employee directors could elect to defer settlement of RSUs upon vesting, to be issued on the earliest of (a) the date of the director's "separation from service" (as defined under Treasury Regulation Section 1.409A-1(h)), unless a six month delay would be required under such Section, (b) the date of a change in control of NVIDIA that also would constitute a "change in control event" (as defined under Treasury Regulation Section 1.409A-3(i)(5)), and (c) the third Wednesday in March of the year elected by the director, which year must have been no earlier than 2020. Messrs. Gaither, Jones, and McCaffery, Dr. Drell, and Ms. Hudson elected to defer settlement of the RSUs granted to them in Fiscal 2019.

Other Compensation/Benefits

Our non-employee directors are reimbursed for expenses incurred in attending Board and committee meetings and continuing educational programs pursuant to our Corporate Governance Policies. However, we do not offer change-in-control benefits to our directors, except for the vesting acceleration provisions in our equity plans that apply to all holders of stock awards under such plans in the event that an acquirer does not assume or substitute for such awards.

Director Compensation for Fiscal 2019

Name	Fees Earned or Paid in Cash (\$)	Stock Awards (\$) *	Total (\$)
Robert K. Burgess	75,000	237,977	312,977
Tench Coxe	75,000	237,977	312,977
Persis S. Drell	75,000	237,977	312,977
James C. Gaither	75,000	237,977	312,977
Dawn Hudson	75,000	237,977	312,977
Harvey C. Jones	75,000	237,977	312,977
Michael G. McCaffery	75,000	237,977	312,977
Mark L. Perry	75,000	237,977	312,977
A. Brooke Seawell	75,000	237,977	312,977
Mark A. Stevens	75,000	237,977	312,977

* On May 17, 2018, each non-employee director received his or her RSU grant for 963 shares. Amounts shown in this column do not reflect dollar amounts actually received by the director. Instead, these amounts reflect the aggregate full grant date fair value calculated in accordance with FASB Accounting Standards Codification Topic 718, or FASB ASC Topic 718, for awards granted during Fiscal 2019. The assumptions used in the calculation of values of the awards are set forth under Note 3 to our consolidated financial statements titled *Stock-Based Compensation* in our Form 10-K. The grant date fair value per share for these awards as determined under FASB ASC Topic 718 was \$247.12.

The following table provides information regarding the aggregate number of RSUs and stock options held by each of our non-employee directors as of January 27, 2019:

Name	RSUs	Stock Options	Name	RSUs	Stock Options
Robert K. Burgess	6,695	66,041	Harvey C. Jones	3,021	—
Tench Coxe	482	—	Michael G. McCaffery	13,677	—
Persis S. Drell	11,619	—	Mark L. Perry	482	—
James C. Gaither	3,021	—	A. Brooke Seawell	482	50,000
Dawn Hudson	26,727	90,177	Mark A. Stevens	482	—

6,213 RSUs for which settlement was previously deferred were ultimately issued in Fiscal 2019 to each of Messrs. Gaither, Jones, and McCaffery.

Review of Transactions with Related Persons

It is our policy that all employees, officers and directors must avoid any activity that is in conflict with, or has the appearance of conflicting with, our interests. This policy is included in our Code of Conduct and our Financial Team Code of Conduct. We conduct a review of all related party transactions for potential conflict of interest situations on an ongoing basis and all transactions involving executive officers or directors must be approved by the NCGC or another independent body of the Board. Except as discussed below, we did not conduct any transactions with related persons in Fiscal 2019 that would require disclosure in this proxy statement or approval by the NCGC.

Transactions with Related Persons

We have entered into indemnity agreements with our executive officers and directors which provide, among other things, that we will indemnify such executive officer or director, under the circumstances and to the extent provided for therein, for expenses, damages, judgments, fines and settlements he or she may be required to pay in actions or proceedings which he or she is or may be made a party by reason of his or her position as a director, executive officer or other agent of NVIDIA, and otherwise to the fullest extent permitted under Delaware law and our Bylaws. We intend to execute similar agreements with our future executive officers and directors.

See the section below titled *Employment, Severance and Change-in-Control Arrangements* for a description of the terms of the 2007 Plan, related to a change-in-control of NVIDIA.

During Fiscal 2019, we granted RSUs to our non-employee directors, and RSUs and PSUs to our executive officers. See the section above titled *Director Compensation* and the section below titled *Executive Compensation*.
